

Architape Pro 100 TW2

Flexible tuneable white LED strips

Architape Pro 100 TW2 LED strips are the ideal choice for applications where the human circadian rhythm effect needs to be considered. Containing 112 warm white and 112 cool white Nichia LEDs per meter, they are designed for long-term, professional use in person-centred lighting.

They offer an extra-long operating life and stable performance, through a combination of a robust and flexible copper PCB, high-end LEDs and a current stabilization system.

Exceptional thermal stability is achieved by using a special thermally conductive tape which guarantees perfect heat transfer to the mounting surface.
